Suspicious Device Located

Riverside, CA – On July 18, 2012, Riverside Police Officers responded to the west entrance gate to the Riverside Police Department Magnolia station off of Nye St. regarding a suspicious device located. A Riverside Police Department employee was driving into work when he noticed what appeared to be a metal colored briefcase left unattended on the sidewalk in front of the entrance gate.

The Riverside Police Department Technical Services Unit responded to the scene and determined the device they located was a Brinks home safe. After Technical Services Unit Detectives discovered the device was non-explosive, officers cleared the scene.
